

NetDoc®2 Network Cable Management Software System

www.BradyID.com/netdoc

Know what
you have,
where it's located
and what it's
connected to...

NetDoc®2 Network Cable Management Software is a web-enabled network documentation and identification solution that can effectively increase productivity, reduce costs and improve user services.

Compliant with ANSI/TIA/EIA 606 documentation, NetDoc®2 software gives you the ability to document every aspect of your network, including horizontal and backbone cables, face plates, patch panels, racks, hardware, assets, pathways, locations, users and more.

Document, Label, & Manage Your Network with One Easy-to-Use System

- Point-and-click management to network infrastructure
- Efficient asset management within one physical network
- Seamless integration - print directly to Brady high performance printer systems
- Trouble-free labeling of new and existing cables, ports and components
- Complete ANSI/TIA/EIA-606 compliant solution

Reduce Downtime and Increase Savings with Effective Network Management

- Faster planning for network growth
- Superior network support with quick and easy troubleshooting
- Shorter training time for new IT professionals
- Reduced excess spending on circuits and unneeded equipment
- Easy-to-use, adaptable software for flexible documentation choices

Network Cable Management Software
demo at www.BradyID.com/netdoc

All-in-one software solution for network identification, documentation and management.

Data Center Rack Documentation

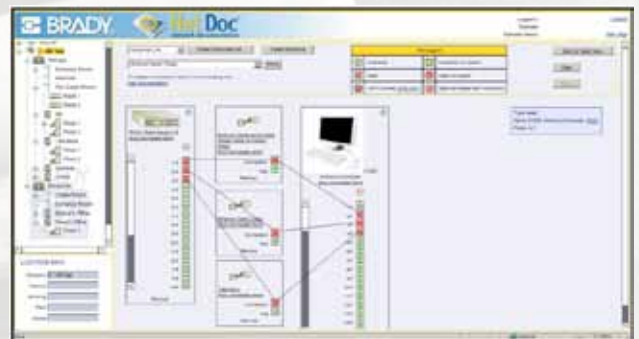

NetDoc®2 Network Cable Management Software offers an advanced user interface with rack documentation capabilities, expanded search options, faster functionality, and more.

- Racks can be added to a floor or space and defined by asset, termination hardware and backbone cables
- Expanded search capabilities, including circuit ID and extension searches
- Trace through cable connections through racks and components assigned to racks
- Show all ports and spaces by using circuit IDs on multiple pairs (IDs can be saved, searched and updated)
- Document air-blown fiber, including splicing, pathways within pathways, and custom types and fields
- Track fiber through TDUs, manholes, and floors to network components inside the data center or closet for an entire view of cable runs on the network

Connecting Network Components

The software also offers a visual interpretation of the components, accompanied by the component's respective quantity of ports.

- Features drag-and-drop functionality to connect ports
- Users can connect assets, horizontal links, and termination hardware with ease
- Cross-connect patch panels to switches and horizontal links
- Vastly reduces the time it takes to connect links

Microsoft Office Excel Interface to NetDoc®2 Software

Designed for easy navigation and usability, NetDoc®2 Network Cable Management Software gives users the ability to use Microsoft Excel to provide live updates to the software's database with the following new functions:

- Define and verify assets, termination hardware, backbone cables, backbone pairs, asset ports, and horizontal links in Excel direct from the closet or data center
- Populate cells in Excel with data from the NetDoc®2 system using the software's database-connected navigation tool – a helpful tool for checking or updating the system for documented network equipment while in the closet, office space or data center.
- Quickly navigate to and from the "Welcome" sheet with direct links on every sheet in the tool

Export Functionality

With NetDoc®2 Network Cable Management Software's Excel Interface, users can pull live data directly from the NetDoc®2 system and quickly export it into a convenient, easy-to-use Excel document.

- Export list view contents directly to Excel
- New "Export to Excel" function in LabelMark™ Software for use with Help Desk or other network management applications
- Select network hardware like patch panels, switches, cables or an entire rack for printing on Brady portable and bench top printers

Take Control of Your Network with NetDoc®2 Documentation Software Solutions

NetDoc®2 software offers the advanced network management tools for effective cable management, network disaster recovery, network documentation, and more.

Document Your Network:

- Documentation wizards
- Attachment capabilities (Visio, AutoCad, digital photos, PDFs)
- Pathways and cable support for documenting air-blown fiber
- Continuous circuit tracing with circuit IDs for one or multiple strands
- Cross connects between two assets with horizontal links

Label Your Network:

- Seamless integration with Brady LabelMark™ Software
- Advanced Microsoft Excel interface with enhanced navigation, printing, and database management
- Quick export operation for easy label printing at any point in network layout

Manage Your Network:

- User and date-stamping on all notes
- Expanded search capabilities with circuit ID and extension search options
- Customizable fields for flexible network management
- Web-enabled solution with log-in security
- Improved installation process with built-in database and IIS configuration

Server Requirements:

Operating System:

- Windows® XP Professional (SP3)
- Windows® 2008 Server (SP1)
- Windows® 2003 Server (SP2)
- Windows® 2008 R2 Server (SP1)

Processor: 2 GHz or greater (Make sure your system has the minimum processor speed recommended for your operating system)

Memory: 1 GB (Make sure your system has the minimum amount of memory recommended for your operating system)

Hard Disk Space: Hard drive with at least 30 GB of available space

Additional Requirements:

- Net Framework v3.5
- IIS v5.0, v5.1, v6.0, v7.0 (Server 2008 and Vista) or v7.5 (Server 2008 R2 and Win 7 Pro, Ent and Ultimate) installed
- Microsoft SQL Server 2000, 2005, 2005 Express, 2008, 2008 Express, or 2008 R2 installed
- CD-ROM drive

Client Workstation Requirements:

Operating System:

- Windows® XP Home (SP3)
- Windows® Vista Business (SP1)
- Windows® 7 (SP1)

Processor: 1 GHz or greater (Make sure your system has the minimum processor recommended for your operating system)

Memory: 256 MB (Make sure your system has the minimum amount of memory recommended for your operating system)

Display Resolution: 1024 x 768

Additional Requirements:

- Adobe® Reader v6.0 or later
- Microsoft® Internet Explorer 7 or later
- CD-ROM drive

Complete the NetDoc®2 Network Cable Management Software with these Brady components:

- Brady LabelMark™ Labeling Software
- Brady IP™ Thermal Transfer Printer
- IDXPRT™ Labeling Printer
- TLS 2200® Thermal Transfer Printer
